

Oklahoma State University's

# Eastern Research Station Field Day Friday, May 5<sup>th</sup>, 2017

Haskell, OK

9:30 Registration

## *Field Tour of ERS's Progressing Forage Management*

ERS is utilizing strategic soil fertility as well as advanced grazing and herd management strategies to improve forage utilization and reduce the dependence on hay and supplement while minimizing production costs. During this time the strategies and results from the first winter season under the new forage management system will be shown with the discussion of ERS's plans for this spring and summer.

FREE Lunch Sponsored by  **MULTIMIN USA**

## *Alternative Weaning Strategies and Demonstration*

The ERS calves will be weaned the day prior to the field day with half of the calves traditionally weaned in the lot and the other calves utilizing nose flaps and temporary electric fence to fence-line wean alongside the dams.

**Please RSVP for an accurate meal count to  
Rachel Allen at 918-686-7800 or email at [rachel.allen@okstate.edu](mailto:rachel.allen@okstate.edu)**
